Erzählen Sie mir von der rechtlichen Überprüfung

ASSISTANT: Die rechtliche Überprüfung ist ein Prozess, bei dem die Einhaltung gesetzlicher Bestimmungen und Vorschriften durch eine Organisation oder Einzelperson bewertet wird. Dieser Prozess umfasst in der Regel die Prüfung von Dokumenten wie Verträgen, Vereinbarungen, Richtlinien und Protokollen sowie die Bewertung von Geschäftspraktiken und -prozessen im Hinblick auf potenzielle rechtliche Risiken.

Die rechtliche Überprüfung kann durch interne oder externe Experten wie Anwälte, Buchhalter oder Wirtschaftsprüfer durchgeführt werden. Sie umfasst in der Regel die Prüfung von Dokumenten auf Vollständigkeit und Konsistenz mit geltenden Gesetzen und Vorschriften sowie die Bewertung potenzieller rechtlicher Risiken und Empfehlungen für Maßnahmen zur Risikominderung.

Die Ergebnisse der rechtlichen Überprüfung werden oft in einem Bericht zusammengefasst, der mögliche Probleme identifiziert, Empfehlungen zur Behebung dieser Probleme gibt und die allgemeine Einhaltung bewertet. Dieser Bericht kann verwendet werden, um die Einhaltung zu verbessern, rechtliche Streitigkeiten zu vermeiden und das Unternehmen oder die Organisation vor möglichen rechtlichen Risiken zu schützen.

CURRENT ENGAGEMENT - EMI SYSTEM

MVP Implementation - UAT

SIGNED OFF

(Delivered in 4 months)

- Implemented Multi tenant EMI Solution for extended warranty & prepaid maintenance
- Customer Onboarding , Merchant Login, Dealer Login , NBFC Login, Mavi Admin Login

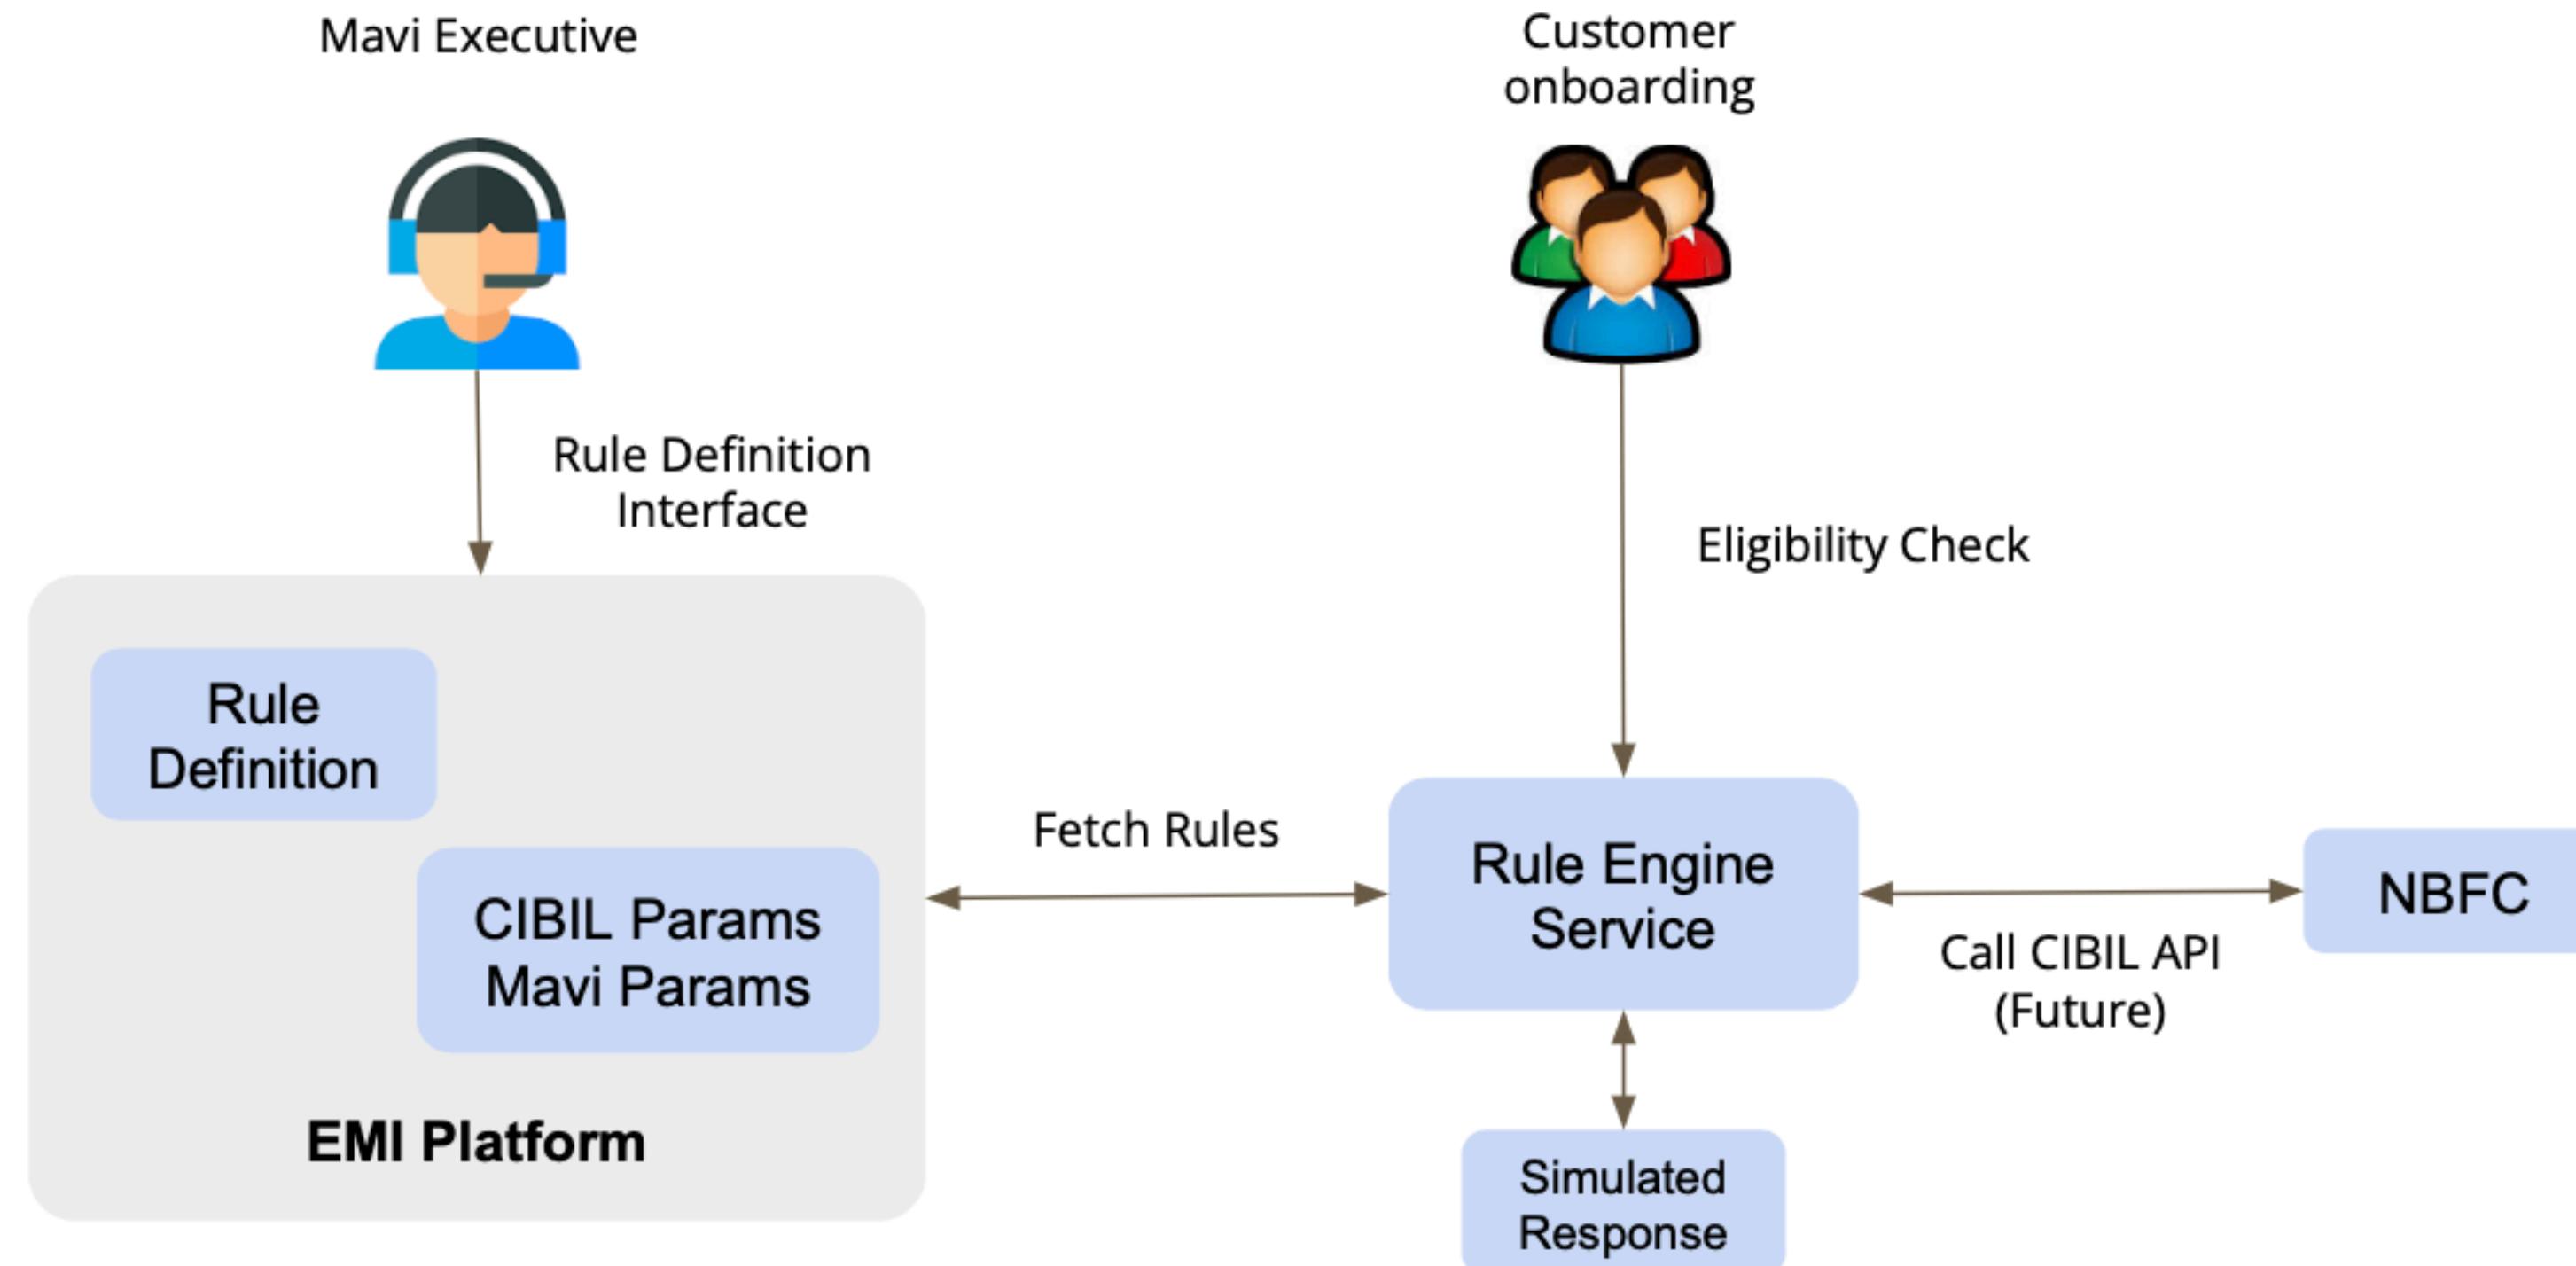

GO - NOGO Decision Engine - In

BRD Sign Off

(Expected UAT : 25th May)

- A decision engine shall be implemented to automate the selection of loan limit leveraging multiple factors including CIBIL Score
- Integration with NBFC for automated CIBIL Lookup

DECISION ENGINE

PROOF OF CONCEPTS (RSA - GERMANY)

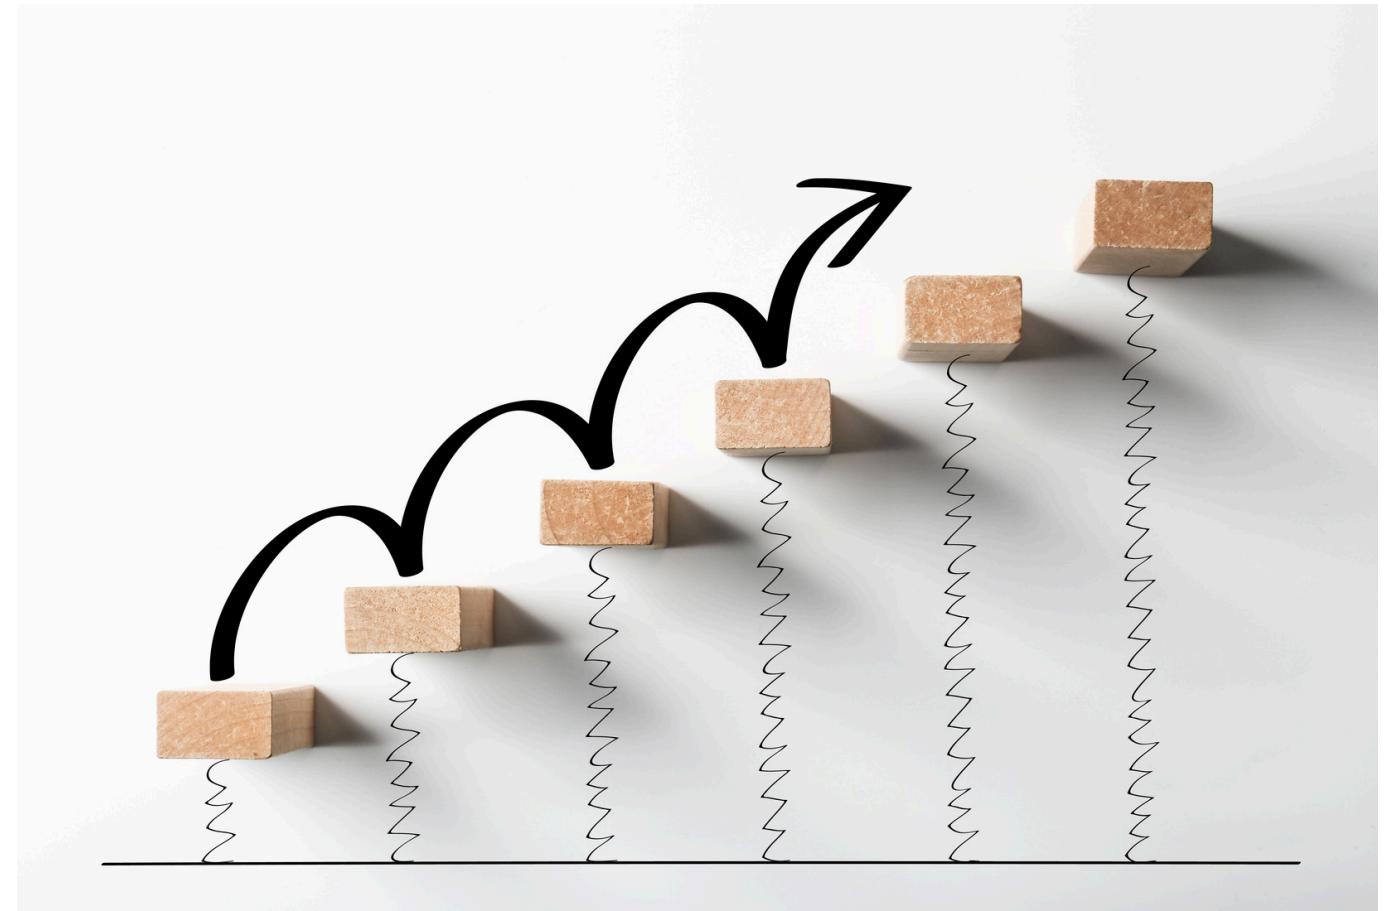

Automated Document Translation

- Implement AI/ML based service to translate English document in German

Document Management with Conversational AI

- Showcased a demonstration of a DMS with LLM based Chatbot
- Now you can chat with your documents
- Hosted on premise.
